

WellCycle AFE Manager

Automating the AFE Approval Process

Streamline AFE approvals to accelerate results

STREAMLINE AFE CREATION

Quickly create AFEs of various types using AFE templates to assure consistency and accuracy.

EXPEDITE AFE APPROVALS

Govern all AFEs through a consistent approval process, streamlining and automating the workflow, to significantly shorten approval time.

INCREASE VISIBILITY

Provide web-based access to a single source of the truth for AFE related information.

ANALYZE AFE REPORTS

Run AFE reports to compare accounting actual costs with AFE estimates and analyze variances.

WellCycle's AFE (Authorization for Expenditure) solution provides oil and gas companies with a centralized solution to manage the AFE process, from creation through approval. The solution streamlines the entire AFE process to simplify AFE creation and expedite the time to approval. All AFEs are stored in a central repository to eliminate redundancy across applications and provide a "single source of the truth" for AFE information.

The system provides Web-based access to a central repository of AFEs, facilitating visibility, collaboration, and smooth handoffs between the disciplines involved in the AFE approval process. All AFEs are managed through a consistent approval process to enforce sound governance and SOX compliance.

AFE Creation

- Quickly create AFEs of various types using templates to ensure consistency and accuracy.
- Govern the AFE creation process to eliminate incomplete or incorrect AFEs
- Attach supporting documents to AFEs

AFE Approval Process

- Route AFEs through an electronic approval process to significantly shorten time to approval
- Automatically route AFEs through approval chains until approval authority has been achieved
- Approve or reject AFEs on a mobile device or via Email
- Simplify the process of revising or supplementing AFEs
- Maintain an audit trail of AFE changes and approvals to support SOX compliance requirements

Track AFE Budget vs. Actual Costs

- Compare accounting actual costs to original estimates
- Easily identify variances between budget estimates and actual expenditures
- Link AFEs to related invoices
- Seamlessly integrate AFE data with your internal accounting system

AFE Reporting and Analysis

- Generate standard AFE reports or custom reports using Microsoft SQL Server Reporting Services
- Filter and sort reports to highlight relevant data
- Quickly export reports or data views to other formats such as Excel or PDF

HIGHLY SECURE

WellCycle employs a powerful security model addressing physical, network, system, and application level concerns offering maximum protection of your confidential data.

IMMEDIATE AVAILABILITY

WellCycle solutions can be accessed immediately in the cloud in our world-class, SSAE 16 certified data center, or installed in your internal data center.

MAXIMUM SCALABILITY

A state-of-the-art infrastructure ensures that our solutions can scale to manage the growing requirements of your organization.

Features and Benefits

The WellCycle AFE Management system provides critical tools and modules to facilitate the well planning process, including:

- **AFE Workflow and Approvals** – Govern all AFEs through a consistent workflow automating approvals and notifications.
- **Attach Documents** – Store AFE-related documents, such as plats, prognosis, permits, submittals, and AFEs in a central document repository.
- **Adaptable Platform** – Quickly and easily adapt WellCycle AFE Manager to your unique AFE process – without programming.
- **Integration with other Systems** – An open SQL Server database architecture allows other systems, such as Accounting or Well Planning, to be easily integrated with AFE data.

ABOUT WELLCYCLE

WellCycle delivers enterprise software solutions for the oil and gas industry. Our solutions help companies to automate and streamline key processes, facilitating visibility and collaboration across functional disciplines. The company began in 1992, as a service organization providing strategic management consulting in the areas of process improvement and project management, then began delivering software solutions in 1999 to help their corporate customers to automate and govern these processes. In 2012 our focus turned to the oil and gas industry with the release of WellCycle Well Planning, the industry's first web-based well planning solution, and WellCycle AFE Manager, automating the AFE creation and approval process. Since then WellCycle solutions have been implemented at some of the fastest growing and most successful oil and gas companies, including Encana and Pioneer Natural Resources. The company is privately held and headquartered in the San Francisco bay area, with sales and support offices in Texas.

Technology Platform

WellCycle employs a state-of-the-art technical infrastructure leveraging today's most powerful technologies:

- **Microsoft Internet Explorer** – Users need only Microsoft's Internet Explorer Web-browser to collaborate on the WellCycle platform.
- **Microsoft Server Platform** – WellCycle leverages Microsoft's Windows Server, Internet Information Server, and SQL Server to deploy a powerful and secure enterprise application.
- **Microsoft SQL Server Reporting Services** – Leverage the power of Microsoft's enterprise reporting system to benefit from high end business analytics.
